Summary

As a developer, my priority is to provide high-quality solutions while optimizing time and resources. In the team, I appreciate the support of both the business atmosphere and friendly relations.

Project Experience

Directory - catalog of plants.
As part of this project, I used React, SPA creation technology, React-Bootstrap. As a result, an application was created with a responsive layout and transition between pages without reloading, for deployment used gh-pages. GitHub.

Catalog for accounting user data.
As part of this project, I used the React, Type Script, Redux, react-hook-form, Netlify. During development, the form validation functionality was implemented using the react hook form, and TS was used to check types. I set up the deployment of the project using Netlify. GitHub
