SUMMARY

Experience in frontend technologies over 2 years. I have experience in developing as an independent developer and team projects using the Scrum methodology. Responsible for solving business issues. Communicative at work.

PROJECT EXPERIENCE

Registration-table   GitHub

<React/><react-create-app/><TypeScript/>< @redux/toolkit/><react-hook-form/><Netlify/><NPM/><Material UI/><Figma/><VS Code/>
- A Web Application for keeping users data.
- Role: created table in which render the data from the Store (use @reduxjs/tookit to store and manage the data), created registration-forms and validated using react-hook-form, typed Application with TypeScript, used Netlify for deployment.

Directory-plants   GitHub

<React/><react-create-app/><react-router-dom/><React-bootstrap><gh-pages/><NPM/><VS Code/>
- A Web Application contains information about plants.
- Role: created UI components used React-bootstrap, for deployment used gh-pages.

EXPERIENCE

Training courses and self - education
Front-end (React) developer – (Oct.2019 – present)
Resposibility:
- Development own projects and resolving real practice cases (GitHub).
- Development of the projects in studied courses(GitHub).
